Amendments to the drawings:

Proposed drawing corrections for Figs. 13A, 14B, 15B and 22 are included herein. New sheets for the proposed drawing corrections are also included for substitution.

REMARKS

By this preliminary amendment, Applicants have canceled claims 1-7 and

claim 10. Claims 8-10 and new claims 11-19 have been presented to better encompass

the full scope and breadth of Applicants' disclosure as originally disclosed in the

Specification. It is respectfully believed that the prior art references of the past do not

anticipate, teach or suggest such a novel combination of elements contained within these

claims.

Applicants have also corrected some minor informalities with respect to

the specification and drawings which were noted in Applicants' parent application and

related applications.

Early and favorable consideration of the claims of the present application is

earnestly solicited.

Respectfully submitted

Edward C. Meagher Attorney for Applicants
